CONTENTS TO VOLUME 37

PART 1 5 JUNE 1969

A visual investigation of the wall region in turbulent flow. E. R. CORINO and ROBERT S. BRODKEY *page* 1

Non-linear wave propagation in a relaxing gas. P. A. BLYTHE 31

Turbulent buoyant convection from a source in a confined region. W. D. BAINES and J. S. TURNER 51

The effect of initial conditions and lateral boundaries on convection. THEODORE D. FOSTER 81

Calculation of incompressible flow past a circular cylinder at moderate Reynolds numbers. ROBERT LEIGH UNDERWOOD 95

The dynamic balances of dissolved air and heat in natural cavity flows. C. BRENNEN 115

Turbulent boundary-layer flow on a rotating disk. T-S. CHAM and M. R. HEAD 129

An experimental investigation of the composition of jet noise. G. KRISHNAPPA and G. T. CSANADY 149

Slow oscillations in an ocean of varying depth. Part 1. Abrupt topography. P. B. RHINES 161

Slow oscillations in an ocean of varying depth. Part 2. Islands and seamounts. P. B. RHINES 191

REVIEW

Loose Boundary Hydraulics, by A. J. Raudkivi 207

PART 2 23 JUNE 1969

Hartmann flow in annular channels. Part 2. Numerical solutions for low to moderate Hartmann numbers. C. J. APELT 209

On the reflexion of wave characteristics from rough surfaces. M. S. LONGUET-HIGGINS 231

Longitudinal vortices in natural convection flow on inclined plates. E. M. SPARROW and R. B. HUSAR 251

Spherical cap bubbles with laminar wakes. JEAN-YVES PARLANGE 257

Effects of sound on separated flows. JON A. PETERKA and PETER D. RICHARDSON 265

On thermohaline convection with linear gradients. P. G. BAINES and A. E. GILL 289

Axisymmetric inertial oscillations of a fluid in a rotating spherical container. KEITH D. ALDRIDGE and ALAR TOOMRE 307

XUM

Experiments on shock stand-off distance in non-equilibrium flow. Peter P. Wegener and George Buzyna *page* 325

The flow induced by torsional oscillations of infinite planes. A. F. Jones and S. Rosenblat 337

On the structure of a class of aerothermodynamic shocks. P. A. Blythe, D. G. Petty, D. A. Schofield and J. L. Wilson 349

Variations in filtration velocity due to random large-scale fluctuations of porosity. Yu. A. Buyevich, A. I. Leonov and V. M. Safrai 371

Rough wall turbulent boundary layers. A. E. Perry, W. H. Schofield and P. N. Joubert 383

Review

Mécanique des fluides, by E. A. Brun, A. Martinot-Lagarde and J. Mathieu 414

Part 3 10 July 1969

On the generation of double Kelvin waves. L. A. Mysak 417

The motion of a fluid in a cylindrical container with a free surface following vertical impact. Jerome H. Milgram 435

A law of the wall for compressible turbulent boundary layers with air injection. L. C. Squire 449

On Howard's upper bound for heat transport by turbulent convection. F. H. Busse 457

Jets from two-dimensional symmetric nozzles of arbitrary shape. Bruce E. Larock 479

Smoke observations of the formation of a Kármán vortex street. M. M. Zdravkovich 491

Self-similar piston problems with radiative heat transfer. J. B. Helliwell 497

Initial propagation of impulsively generated converging cylindrical and spherical shock waves. Glen G. Bach and John H. Lee 513

Distortion of sonic bangs by atmospheric turbulence. S. C. Crow 529

Particle collision efficiencies for a sphere. D. H. Michael and P. W. Norey 565

On vortex shedding from a circular cylinder in the critical Reynolds number régime. P. W. Bearman 577

Velocity and pressure distributions in the aortic valve. B. J. Bellhouse 587

The deformation of a drop in a general time-dependent fluid flow. R. G. Cox 601

Part 4 28 July 1969

The calculation of three-dimensional turbulent boundary layers in incompressible flow. J. F. Nash 625

On the penetration of a turbulent layer into stratified fluid. H. KATO and O. M. PHILLIPS *page* 643

Stokes flow around a circular cylindrical post confined between two parallel plates. J. S. LEE and Y. C. FUNG 657

A numerical solution of axisymmetric cavity flows. CHRISTOPHER BRENNEN 671

Spin down problem of rotating stratified fluid in thermally insulated circular cylinders. TAKEO SAKURAI 689

Some aspects of turbulence measurement in liquid mercury using cylindrical quartz-insulated hot-film sensors. D. G. MALCOLM 701

A note on the damping and oscillations of a fluid drop moving in another fluid. S. V. SUBRAMANYAM 715

Numerical integration of the three-dimensional Navier–Stokes equations for incompressible flow. GARETH P. WILLIAMS 727

On the flow past a sphere at low Reynolds number. W. CHESTER and D. R. BREACH 751

The interaction of internal waves with an unsteady non-uniform current. YEE-CHANG WANG 761

On the trappings of long-period waves round islands. M. S. LONGUET-HIGGINS 773

Free convection at low Prandtl numbers. H. K. KUIKEN 785

Peristaltic pumping with long wavelengths at low Reynolds number. A. H. SHAPIRO, M. Y. JAFFRIN and S. L. WEINBERG 799

CONTENTS TO VOLUME 38

PART 1 14 AUGUST 1969

Quadrupole correlations governing the pattern of jet noise. H. S. RIBNER *page* 1

On the motion established by a constant energy explosion followed by an expanding piston. F. A. GOLDSWORTHY 25

Stability of three-dimensional laminar and turbulent shear layers. M. LESSEN, G. HARPAVAT and H. M. ZIEN 39

Some calculations of gravity wave resistance in an inviscid stratified fluid. R. F. MACKINNON, R. MULLEY and F. W. G. WARREN 61

Viscous flow in a cylindrical tube containing a line of spherical particles. HENRY WANG and RICHARD SKALAK 75

Viscous dissipation in external natural convection flows. B. GEBHART and J. MOLLENDORF 97

The interaction region in the boundary layer of a shock tube. S. D. BAN and G. KUERTI 109

Diffraction of a plane shock by an analytic blunt body. JOHN P. MORAN and WILIAM K. VAN MOORHEM 127

Mixed convection from a sphere at small Reynolds and Grashof numbers. C. A. HIEBER and B. GEBHART 137

On the outer-edge problem of a hypersonic boundary layer. RICHARD S. LEE and H. K. CHENG 161

Some observations on skin friction and velocity profiles in fully developed pipe and channel flows. V. C. PATEL and M. R. HEAD 181

Distant side-walls cause slow amplitude modulation of cellular convection. LEE A. SEGEL 203

PART 2 3 SEPTEMBER 1969

Some electrically driven flows in magnetohydrodynamics. Part 3. The asymptotic theory for flow between circular electrodes. J. C. R. HUNT and K. STEWARTSON 225

The effect of a parallel magnetic field on the stability of free boundary-layer type flows of low magnetic Reynolds number. S. ABAS 243

A laboratory model of the wind-driven ocean circulation. R. C. BEARDSLEY 255

Note on eigenvalue bounds for the Orr–Sommerfeld equation. CHIA-SHUN YIH 273

XUM

Finite bandwidth, finite amplitude convection. Alan C. Newell and J. A. Whitehead *page* 279

Real space–time Green's functions applied to plate vibration induced by turbulent flow. D. G. Crighton and J. E. Ffowcs Williams 305

The strength of vortex and swirling core flows. B. R. Morton 315

Magnetohydrodynamic flow between rotating coaxial disks. C. J. Stephenson 335

Anisotropic surface waves under a vertical magnetic force. J. A. Shercliff 353

Internal wave propagation in an inhomogeneous fluid of non-uniform depth. Joseph B. Keller and Van C. Mow 365

The effect of horizontal gradients on thermohaline convection. S. A. Thorpe, P. K. Hutt and R. Soulsby 375

Non-linear theory of unstable plane Poiseuille flow. E. H. Dowell 401

On higher-order wave theory for submerged two-dimensional bodies. Nils Salvesen 415

Part 3 18 September 1969

Axisymmetric turbulent mass transfer in a circular tube. Alan Quarmby and R. K. Anand 433

Non-axisymmetric turbulent mass transfer in a circular tube. Alan Quarmby and R. K. Anand 457

Visualization of transition. F. X. Wortmann 473

Separation and magnetohydrodynamics. John Buckmaster 481

Scattering of surface waves by rectangular obstacles in waters of finite depth. Chiang C. Mei and Jared L. Black 499

Reacting flow as an example of a boundary layer under singular external conditions. Raul Conti and Milton Van Dyke 513

The drag on a cloud of spherical particles in low Reynolds number flow. Christopher K. W. Tam 537

Hypersonic weak-interaction solutions for flow past a very slender axisymmetric body. Arthur K. Cross and William B. Bush 547

Vortex shedding from slender cones at low Reynolds numbers. M. Gaster 565

Some measurements in the self-preserving jet. I. Wygnanski and H. Fiedler 577

Note on the swimming deceleration of a dolphin. P. P. Niiler and H. J. White 613

On the non-linear Lamb–Taylor instability. Ali Hasan Nayfeh 619

Existence and uniqueness of normal shock waves in gas-particle mixtures. Barbara Schmitt-Von Schubert 633

PART 4 6 OCTOBER 1969

Adiabatic transverse waves in a rotating fluid. C. SOZOU and J. SWITHENBANK *page* 657

Magnetogasdynamic thrust bearing with an axial pinch. G. RAMANAIAH 673

Disintigration of charged liquid jets. A. L. HUEBNER 679

Breakup of a laminar capillary jet of viscoelastic fluid. MICHAEL GOLDIN, JOSEPH YERUSHALMI, ROBERT PFEFFER and REUEL SHINNAR 689

On the dynamic motion of a thin flexible cylinder in a viscous stream. C. R. ORTLOFF and J. IVES 713

Stability and dynamics of rotating dielectrophoretic equilibria. R. T. CALVERT and J. R. MELCHER 721

Measurements of spectral energy transfer in grid turbulence. C. W. VAN ATTA and W. Y. CHEN 743

A note on spatially growing three-dimensional disturbances in a free shear layer. A. MICHALKE 765

The dynamical instabilities of cylindrical shells. J. P. SOMON 769

The development of Poiseuille flow. S. WILSON 793

Upper bounds on the torque in cylindrical Couette flow. E. C. NICKERSON 807

Sink flow turbulent boundary layers. B. E. LAUNDER and W. P. JONES 817

Motion of an axisymmetric body in a rotating stratified fluid confined between two parallel plates. D. V. KRISHNA and L. V. SARMA 833

Swirling flow in tubes of non-uniform cross-sections. CHUEN-YEN CHOW 843

CONTENTS TO VOLUME 39

PART 1 23 OCTOBER 1969

Dynamics and stability of ferrofluids: surface interactions. RONALD E. ZELAZO and JAMES R. MELCHER *page* 1

Experiments on the instability of stratified shear flows: immiscible fluids. S. A. THORPE 25

Surface tension driven oscillatory instability in a rotating fluid layer. G. A. MCCONAGHY and B. A. FINLAYSON 49

On the two-dimensional viscous counterpart of the one-dimensional sonic throat. SHELDON WEINBAUM and RICHARD W. GARVINE 57

Fluid line growth in grid-generated isotropic turbulence. S. CORRSIN and M. KARWEIT 87

Lateral motion of a slender body between two parallel walls. J. N. NEWMAN 97

Structural similarity for fully developed turbulence in smooth tubes. W. R. B. MORRISON and R. E. KRONAUER 117

Some aspects of hypersonic flow over power law bodies. H. G. HORNUNG 143

On two-dimensional laminar wakes and jets. KARL K. CHEN 163

Natural convection above unconfined horizontal surfaces. ZEEV ROTEM and LUTZ CLAASSEN 173

Trailing edge flows. N. RILEY and K. STEWARTSON 193

PART 2 10 NOVEMBER 1969

The fundamental matrix in three-dimensional dissipative gasdynamics. ERIC P. SALATHE 209

On the interaction of an infinite shallow draft cylinder oscillating at the free surface with a train of oblique waves. C. J. GARRISON 227

The model of a single infinite disk oscillating about a state of steady rotation. A. F. JONES 257

The resonance effect of a disk oscillating about a state of steady rotation. A. F. JONES 269

On hydromagnetic waves in a stratified rotating incompressible fluid. R. HIDE 283

On the gas dynamics of an intense explosion with an expanding contact surface. H. K. CHENG and J. W. KIRSCH 289

Turbulent shear layer reattachment downstream of a backward-facing step in confined supersonic axisymmetric flow. T. MUKERJEE and B. W. MARTIN *page* 307

Reflexion of Kelvin waves at the open end of a rotating semi-infinite channel. B. A. PACKHAM 321

Non-linear wave propagation in a relaxing gas. H. OCKENDON and D. A. SPENCE 329

Buoyancy-surface tension instability by the method of energy. STEPHEN H. DAVIS 347

Electron beam density measurements in shock waves in argon. B. SCHMIDT 361

Report on the I.U.T.A.M. Symposium on the flow of fluid–solid mixtures. J. F. DAVIDSON, J. R. A. PEARSON and V. A. VANONI 375

Pneumatic transport. P. R. OWEN 407

PART 3 27 NOVEMBER 1969

Transient motion of a dipole in a rotating flow. JOHN W. MILES 433

The motion generated by a body moving along the axis of a uniformly rotating fluid. W. G. PRITCHARD 443

Low Reynolds number flow of a variable property gas past a heated circular cylinder. P. F. HODNETT 465

Growth of fingers at an unstable diffusing interface in a porous medium or Hele–Shaw cell. R. A. WOODING 477

A theory of the propagation of internal gravity waves of finite amplitude. B. S. H. RARITY 497

A two-layer model of Gulf Stream separation. A. T. PARSONS 511

Unsteady expansions into vacuum with spherical symmetry. R. E. GRUNDY 529

Transition from laminar to turbulent flow. J. E. FFOWCS WILLIAMS, S. ROSENBLAT and J. T. STUART 547

On the spin-up of an electrically conducting fluid. Part 1. The unsteady hydromagnetic Eckman–Hartmann boundary-layer problem. EDWARD R. BENTON and DAVID E. LOPER 561

Spherical piston problem in water. P. L. BHATNAGAR, P. L. SACHDEV and PHOOLAN PRASAD 587

The effects of small quantities of hydrogen, deutrium and helium on vibrational relaxation of carbon dioxide. T. REES and J. K. BHANGU 601

Stability of plane Poiseuille flow to periodic disturbances of finite amplitude. C. L. Pekeris and B. Shkoller *page* 611

The neutral curves of periodic perturbations of finite amplitude of plane Poiseuille flow. C. L. Pekeris and B. Shkoller 629

A note on the buoyancy layer in a rotating stratified fluid. Jill A. Harrington and J. A. Johnson 640

Part 4 15 December 1969

Application to radiative acoustics of Whitman's method for the analysis of non-equilibrium waves phenomena. A. C. Cogley and W. G. Vincenti 641

The radiatively driven discrete acoustic wave. A. C. Cogley 667

On steady recirculating flows. R. Grimshaw 695

Cylindrical shock and detonation waves in magnetogasdynamics. A. H. Christer and J. B. Helliwell 705

Report on the Seventh International Shock Tube Symposium. Daniel Bershader and Wayland C. Griffith 727

The effect of base bleed on the steady separates flow past bluff objects. L. G. Leal and A. Acrivos 735

Steady free convection above a point heat source and a horizontal line heat source in a vertical magnetic field. A. M. Soward 753

The transformation of a solitary wave over an uneven bottom. O. S. Madsen and C. C. Mei 781

Non-linearity, relaxation and diffusion in acoustics and ultrasonics. D. F. Parker 793

Gravity waves over a non-uniform flow. H. G. M. Velthuizen and L. van Wijngaarden 817

The flow induced by the transverse motion of a thin disk in its own plane through a contained rapidly rotating viscous liquid. D. W. Moore and P. G. Saffman 831

Shock collision at a molecular level A. K. Macpherson 849
